1. Claims 2-6 and 8-21 are allowed over the prior art.
2. The following is an examiner's statement of reasons for allowance: regarding claim 4, the primary reason for the allowance of the claim is due to amending the claim into independent form since the limitation, in combination with other limitations, the specific circuit component forma a part of a circuit which switches an auto-tuning sensitivity within the function circuit was found allowable. Since claims 2-3 and 5 depend from claim 4, they also have allowable subject matter.

Regarding claim 8, the primary reason for the allowance of the claim is due to amending the claim into independent form since the limitation, in combination with other limitations, another terminal of the specific circuit component is connected to an internal IC for filtering noise or preventing electrostatic damage was found allowable.

Regarding claim 9, the primary reason for the allowance of the claim is due to amending the claim into independent form since the limitation, in combination with other limitations, the specific circuit component is connected between the external antenna and the tuner for prevention of damage to the tuner was found allowable.

Regarding claim 11, the primary reason for the allowance of the claim is due to amending the claim into independent form since the limitation, in combination with other limitations, the specification comprises identification information of a frequency band used in the electronic apparatus was found allowable.
